TillageMax Indy® delivers a bundle of benefits, starting with the amazing Tillage Radish® taproot that drills right through tough compaction, and Tillage RootMax® Cover Crop Ryegrass with its fibrous roots that are renowned for building soil structure. Add the nitrogen fixing advantages of CCS Crimson Clover and you have an outstanding option for getting more out of your cover crop program.

EXCELLENT FOR:

- Scavenging and storing nitrogen
- Building soil structure
- Restoring soil health
- Relieving compaction

PLANTING TIPS AND SEEDING RATES:

PLANTING: Plant 3 - 10 weeks prior to first killing frost.

PLANTING DEPTH: ¼” – 1”

SEEDING RATE:

DRILLING: 15 lbs/acre

BROADCAST / AERIAL: 17 lbs/acre

PRECISION PLANTING (15” WITH 2” IN-ROW): 12 lbs/acre

CONTROL: Tillage Radish® winter kills with 3 consecutive nights in the mid-teens. Tillage RootMax® and CCS Crimson Clover requires a burndown method. Burndown method should contain two quarts of glyphosate with one pint of 2,4-D.

BEST TO PLANT: Before most cash crops (as long as adequate spring management is planned).

FORAGE:

Increase seeding rate to 20 lbs/acre and add one bag of RootMax® per bag of TillageMax Indy®. If planting earlier for forage, consider increasing small grain component.
